

# Is Noise Net the most reliable way to gather noise complaint evidence?

- Probably Yes:
- Our Legal Quality 24/7 data gathering and reports provide council officers with extended data on the frequency and severity of a noise nuisance.
- Easy to install, complete a field report and we send you the results: SIMPLE.
- But we think our service has been too costly and too slow.

## Introducing **DASHBOARD** Cheaper and Faster. At resolving your complaints

- Daily noise results direct to your email
- Close out complaints within days
- Legal Backup & expert witness available (extra cost, but using the same data)
- Comparable cost to gathering 2 hours of data with your own people
- Technology to SOLVE complaints, not an “app” to make raising complaints easier
- Still able to differentiate between noise sources and detect provocation (extra)
- Proven in court

NoiseNet provides noise regulators, project managers and asset managers with the data and evidence needed to assess, resolve and enforce noise issues. Quickly and affordably.

# NoiseNet DASHBOARD

## TWO OPTIONS for Gathering definitive noise data:

### ① Council Install

Your officers install the NoiseNet smart noise monitor into the field, submitting a field report.

### ② Complainant Install

NEW

The Noise monitor is posted to your complainant via Australia Post. NoiseNet provides remote assistance for them to install the device (forms, videos and help-line). We have built-in additional tamper controls including GPS tracking, tamper-evident cable ties and more.

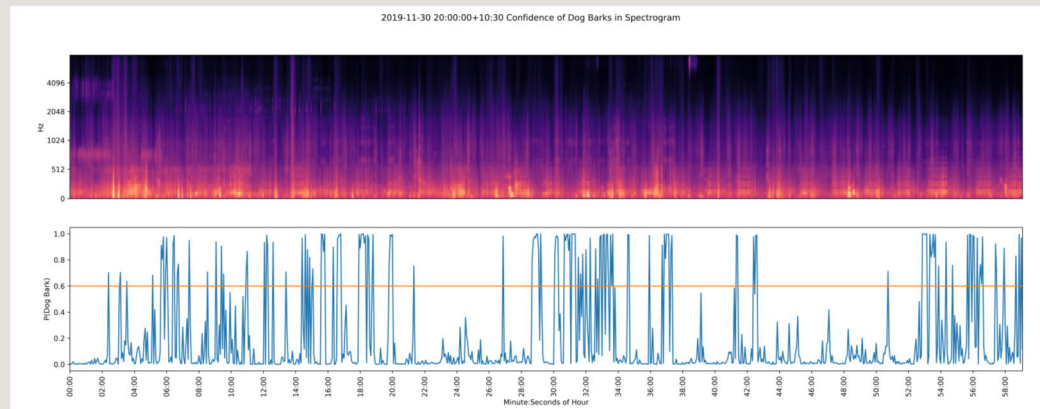

**Keeping your officers out of the field during Covid-19 Restrictions.**

## THEN: Let us do the work

We upload the data to our server then analyse using state-of-the-art artificial intelligence techniques to extract the relevant data.

We provide you with 100's of hours of analysed data, quickly and affordably.

We present the data back to you in the form of reports, alerts or by **DASHBOARD.**

Sent directly to your inbox each day, **DASHBOARD** gives you the power of knowledge. Knowledge to assess, negotiate and to manage the noise nuisance. And the confidence to enforce, knowing you have data to back up your professional assessment.

NoiseNet DASHBOARD  
Take Control of  
the Noise!

Night Exceedances	1	1	0	1	0	0	0	0	0	0
Total Exceedances	2	1	0	0	0	0	0	0	0	0

Note durations in this report are the total of all audible dog barking in the vicinity of the NoiseNet monitoring device. Results are unvalidated and are subject to change. They require manual checking before being used in legal proceedings

		Morning Half Hours
		Daytime Hours
		Night-time Half Hours
00:23	03:34	Barking Durations in m:ss
		Blank cells indicate no monitoring

Immediately see problem noise and visualise patterns

Above is an example dashboard, showing a dog-barking complaints. The dashboard shows significant barking by day, and particularly in the early morning hours.

This data allows effective communication, negotiation and if necessary, enforcement actions.

# NoiseNet DASHBOARD

## Why should our council start using dashboard?:

### ① It gives you long-term data to solve long-term issues

Noise nuisance isn't about one hour, it isn't about 4, it is 24/7 and over prolonged periods of time. Solve your problem with the right data.

### ② Get your Rangers out of the field: **COMPLETELY**

Stand-offs are boring, inefficient, only provide limited data, are expensive and put Officers at risk. With Covid-19 restrictions, we can get your team completely out of the field, and save you time and money.

### ③ Third-party, legal back-up

Not supported by management, councillors, the ombudsman? Or want the heat off the council. NoiseNet offers a third party solution for evidence gathering, analysis and expert witness services. Mostly we keep cases out of court, but in the few cases that have gone to court, our customers have achieved their desired outcomes (one win, one settlement)

### ④ Cut the cost of resolution

The Dashboard allows you to receive initial data within 1 day of installing the monitor. Within 2 weeks you have over 300 hours of evidence. Enough to close the vast majority of cases. And the costs are low enough, fines may even self-recover costs.
